DATA ENGINEER

EDUCATION

Bachelor's in Computer Science, FAST NUCES Lahore
CGPA: 3.12

Aug 2023 - Present

TECHNICAL SKILLS

Languages	C++, Python, C, JavaScript (Node.js), Assembly (x86)
Web Development	HTML/CSS/Bootstrap, Express.js, RESTful APIs
Databases	SQL (MySQL, MSSQL, T-SQL), Database Design
Tools	Git/GitHub, Bash, Linux CLI, DVC, DagsHub, MLflow, FreeMarker, Docker, Airflow
Frameworks	Flask, FastAPI, Django, Node, React

EXPERIENCE

Software Developer
Numeric Soft (pvt)

June 2025 - Aug 2025
Lahore, Pakistan

- Developed dynamic report templates using Jasper Studio.
- Created 9 modern financial dashboards utilizing HTML, CSS Tailwind, Bootstrap, and amCharts.
- Fully implemented dashboard functionality and logic on the client-side (FreeMarker) and server-side (MySQL).
- Created full standalone report modules with dynamic data fetching from the server-side.

PROJECTS

Sentinal AI | *Python, Flask, MLflow, Docker*

- Designed and deployed a real-time violence detection system using MobileNetV2 + Bi-LSTM (20-frame temporal window), achieving **96.35% validation accuracy** on real CCTV footage.
- Built a production-grade MLOps pipeline with 5 Dockerized microservices (Flask inference, MLflow registry, PostgreSQL logging, UI, model initializer), enabling automated model versioning and **zero-downtime startup**.
- Implemented **low-latency** sliding-window inference with FIFO buffering, delivering per-frame predictions with 0s detection delay and triggering alerts at > 85% confidence.
- **Reduced false positives** significantly by combining spatiotemporal modeling and a 3-second cooldown mechanism, preventing redundant alerts during continuous violent events.

Full-Stack Projects | *GitHub*

- Completed multiple full-stack academic and personal projects during semesters, with source code and documentation readily available on GitHub.

COURSES AND CERTIFICATIONS

- **Data Engineering & Orchestration:** Apache Airflow, Docker, Cloud Computing, Data Versioning (DVC).
- **Data Processing & API:** Data Manipulation with pandas, Joining Data with pandas, Introduction to FastAPI, NumPy.
- **Software Development:** Intermediate OOP in Python, Python for Developers.
- **MLOps & Infrastructure:** MLflow, Supervised Learning with scikit-learn, Amazon Cloud Foundations.
